Education

Arizona State University, Tempe, AZ

Expected: May 2029

Bachelor of Science in Neuroscience

Research Interests: Neuropsychiatry, Non-invasive Neuromodulation, Digital Therapeutics (VR/AI)

Urban International School, Toronto, ON, Canada

April 2025

High School Diploma

Clinical & Academic Experience

Quzhou Third hospital (Tertiary Psychiatric Hospital)

Quzhou, China

Clinical Observation Intern & Student Researcher

May 2026 – Aug. 2026

- Clinical Rotations: Rotated through Outpatient, Inpatient, and Psychotherapy departments; shadowed attending psychiatrists during daily clinical rounds and patient evaluations.
- Therapeutic Interventions: Observed and assisted in group therapy sessions, gaining hands-on insight into clinical psychiatric diagnostic workflows and treatment plans.
- Research Contribution: Co-contributed to a clinical research project led by Senior Physician Dr. Shuangli Zhang, assisting with data compilation and case literature review.

Barrow Neurological Institute

Phoenix, AZ

- Consistently attended weekly academic seminars and Grand Rounds, staying informed on advanced topics in neurosurgery, clinical neurology, and cutting-edge research presentations by leading neuroscientists and clinicians.

Nov. 2025 – Present

Projects

Anxin Healthcare System (安心 • Ur NeuroMate)

Lead Developer & Product Architect

- Designed and built a multi-terminal clinical mental health AI platform integrating patient-facing conversational interaction with real-time clinician/therapeutic workstations.
- Implemented conversational digital phenotyping workflows to extract linguistic/symptom indicators from unstructured patient dialogues, enabling real-time diagnostic decision support for psychiatrists and therapists.
- Utilized AI-assisted rapid prototyping tools (Cursor, Workbuddy, EasyClaw, Codex) to architect, program, and iterate full-stack web interactive interfaces and chatbot backend logic.

- Conducted clinical usability testing and iterative evaluations with attending psychiatrists, therapists, patients, and software engineers to optimize UI/UX (User Interface/User Experience) and diagnostic accuracy.

Skills

- Languages: Bilingual (English and Mandarin)
- AI & Technical Prototyping: AI-Assisted Software Development (Cursor, Workbuddy, EsayClaw, Codex), Prompt Engineering, Rapid Web Prototyping, Chatbot Architecture & Workflow Design.
- Clinical & Research Methodologies: Conversational Digital Phenotyping, Clinical Observation Protocols, Patient Diagnostic Workflow Mapping, Qualitative Data Synthesis.

Availability

Flexible part-time schedule this semester:

- Mondays/ Wednesdays before 12:00 PM
- Tuesdays/ Thursdays before 2:00 PM
- Weekends (if needed)
